

# CPE Shoe Cover

Chlorinated Polyethylene disposable CPE non-slip shoe cover

CSC613

## Made from a CPE:

Disposable CPE shoe covers are made from Chlorinated Polyethylene, which is a waterproof and durable material.

## Slip-resistant:

CPE shoe covers are designed to be slip-resistant, reducing the risk of falls and slips.

## Elastic opening:

CPE shoe covers have an elastic opening that provides a snug fit around the shoe, preventing contaminants from entering.

## Disposable:

CPE shoe covers are designed for single-use, making them a hygienic option for a variety of settings.

## Widely used:

CPE shoe covers are commonly used in health-care settings, food processing, and other industries where protection against contamination is necessary.

## Storage:

Store out of direct sunlight in dry conditions between 10°C and 30°C.

## Applications:

Medical, Hospitals, Pharmaceuticals, Laboratory, Dental, Emergency Services, Forensic, Aged Care, Diagnostics, Veterinary, Aged Care, Industrial, Food Manufacturing, General protection for floors, carpets, tiles and sanitised environment.

## Standards & Certification
